1   Permit Testing

It is not possible to write a test for permits because we need another player to check if the permit was send properly.

In order to test if the permits are working properly, Below there is a scenario to describe how permits should work.

The bot doesn't have any strategy yet. This will be done later.

1.1   Send permit request

- Start the Tygron game.

- Run the bot.

- Join the game the bot is on.

- choose municipality as stakeholder.

- wait until the bot builds something.

- wait for the bot to send a permit to build the building..

- accept this permit..

- wait the bot to build another building.

- wait for the permit for this building..

- Accept this permit.
